ACIC INTERNATIONAL

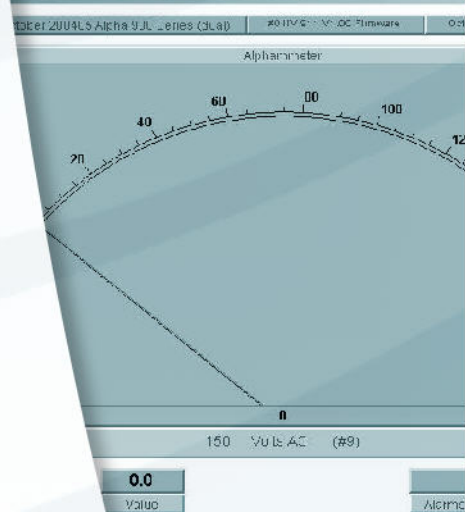

Provides an analogue display and data capture of up to 4 AC voltages 110-240 and 16 DC current measurements using suitable current clamps to 4000Amps DC or up to 12VDC with a resolution of 0.65mV.

Utilising the superior speed and functionality of the Alpha 911 Portable Logger, the Alphameter, is able to monitor and alarm on current measurements that fall above or below the user-defined levels.

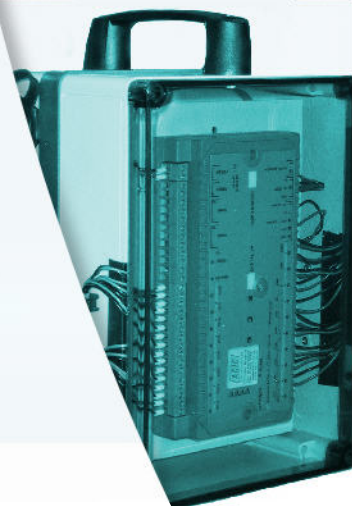

The alarm levels can be changed 'on the fly' by a password-protected procedure using Ethernet or remotely via the GSM modem. On alarm, a text string indicating the value, site name, and a date stamp is written to a file.

As with all ACIC portable loggers, the Alphameter can be networked with additional units, up to 1.2km in distance.

All systems have Dual Media Storage with a removable solid state disk. The data is stored in hourly files and daily directories, in correspondence to RT/E/S/11305.

- ✓ Fully functioning Analogue Display
- ✓ Full Integration with ACIC Product Range
- ✓ Interactive Front end
- ✓ Remote Access Dial-in
- ✓ Monitors Voltage and Current
- ✓ Cost effective

ACIC Alphameter
